

# TURANTO RELEASE DOCUMENT

Turanto – Feb 14, 2020 Release 13.7.4

## Feb 4, 2020 Release

### Overview

- This new release includes some new features, enhancements and bug fixes.

### Release Details

#### Enhancements (Turanto)

- Multitenancy didn't capture all the filtered entities.

#### Features and improvements (Generated Application)

- Create a default background color property in entity Status field.

#### Bug fixes (Generated Application)

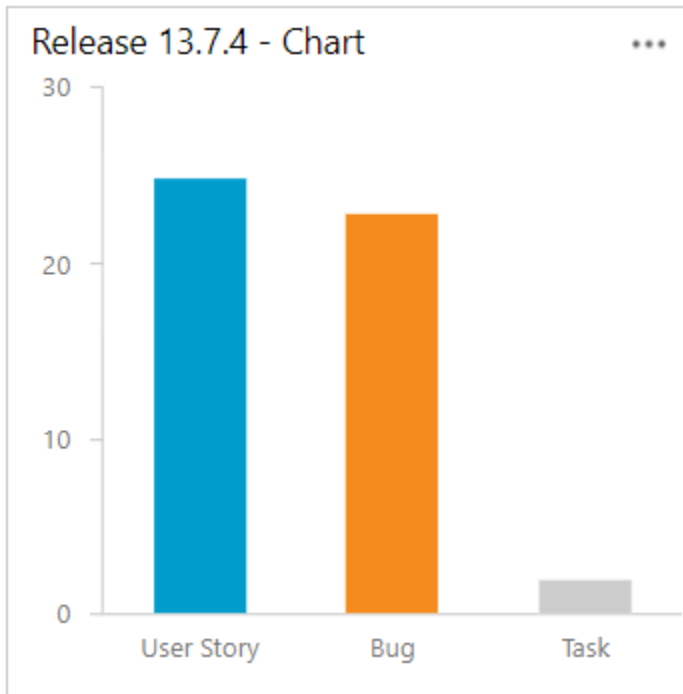

- Set value of Biz rule doesn't work if DateTime property is set as Today
- BR - Export to JSON code missing '}}' at end causing Import to fail
- BR set value for Boolean does not work
- Set Value biz rule not working OnLoadingCreate/OnLoadingUpdate if condition has association and its property other than display value
- BR condition value should not be case sensitive?
- Issues with Active Directory change in latest release
- UI Alert 'OnCreate' shows OnEdit
- Icons are not showing up after publishing the code
- Biz rule issue - Can't create rule with actions hide properties and hide groups in the same rule
- Add opens and closes a couple times before I can make a selection
- When FLS Cannot View set on property, the whole UI group is hidden
- 1:M Inline On grid not hidden through BR
- Launch error - STAP APP
- Create & Continue does not continue
- Record & Associations is read-only through BR but can still create on OnlineGrid
- M:M association School-Degree looks weird for STA Office role
- Comma shows in text field that is read-only)
- Picture did not show on login page but it did show apk download
- Text does not show completely in dropdown while there is enough space
- 'View all' pop-up - cannot go to another page
- Error accessing Users in Admin section
- Users cannot be access for deployed application with AD Users and AD Groups

Last Release Date: Jan 31, 2020 (13.7.3)
