Impact on Development

Web application

- The downloaded solution MDF database file will not support the lower versions of SQL Server.
- You can use SQL Script (available inside the APP_DATA folder) to update the older database.
- Currently, you don't require VS2019 to compile an application, but in the future, there may be a change in code according to the new C# version which may require VS2019 (e.g. [Null Propagation Operator](#))

Xamarin application

- You need VS2019 to modify and compile the Xamarin code.

Impact on Deployment

SQL Server upgrades if you use the database came along with a downloaded solution.

For older databases, no change is required.

Bug fixes (Generated Application)

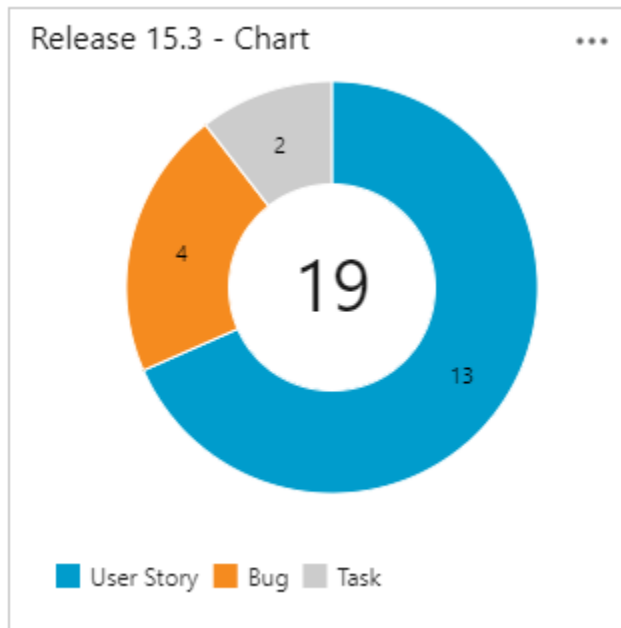

- Quick Faceted search it clears when you pick something else in the dropdown
- Faceted Search multi-select not behaving predictably
- Cannot generate document when in Role
- In Business Rule not able to use Filter Dropdown Action without any condition for Entity
