### Release Details

#### Enhancements (Turanto)

- NA

#### Bug fixes (Generated Application)

- Display Card Functionality Bugs
- Cannot log out of the application in new theme
- No way to bulk associate a user to facility?
- FLS isn't working on one of the fields
- Double quotes show up as &quot; in View Mode for dropdown
- Display Card opening the wrong content
- On Grid edit not working for some dropdowns
- Display Card Not opening in /Edit page when 'i' icon is clicked
- When I have two separate GenApps open in Chrome - it keeps logging me out of both every time I navigate somewhere
- Make 'Notify to' not mandatory in business rules. It should be optional to select either notify to or notify role or both
- Fsearch expand/collapse issue: not showing all records for groupby query
- Hide group/field stops working when value is changed on the screen (before clicking on Save)
- Custom Homepage UI issues - fix in both themes
- Group By contains only 1 record when collapsed
- Group By shows separate group for each record without a value
- Edit SMTP password in new Company Information entity crashes app
- Cannot import required associations
- Data Metric issue with permission and hidden biz rule
- Fsearch issue - can't compare two datetime properties in field search criteria
- Data Metric List issue - Showing wrong results on home page while on fsearch result page shows correct result
- When you edit record via data metric list and then hit Save, you are taken to the data metric filtered list but it's missing the heading
- Don't show Upload Image/Upload Document if the record is locked through business rule
- Email page UI issue - footer appears and header gets lost and top button (from bottom) also not visible
- RIMS Mobile app getting crashed when we tap on supporting document in Incidents Entity.
- Check why 'Purchase Order' entity shows 0 records even though role has permission to view permission
- On /Edit pages the cancel/save bottom bar is imposed on the left menu Template 1 compressed
- Wizard not working properly when applied business rule in RRS\_v1 APP

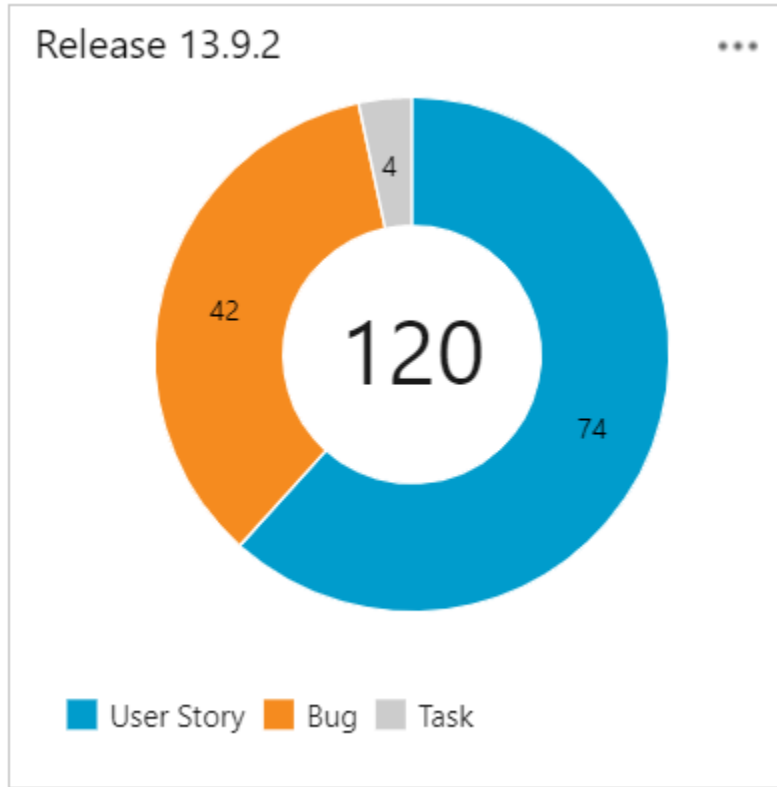

- Xamarin Android App Images are not getting Save/Update
- Xamarin Android App - Sometimes app gets crash when we add/updated records.
- Even though I have picked a value in Business rule 'Pick From List' the UI display says 'None selected'
- The homepage (custom homepage) layout has alignment issues after launched with TurantoBeta
- Unable to create a new Work Order /ARMv9 & /ARMv10
- As soon as I click on a status change, if I get mandatory UI alert messages the hide group business rule stops working
- Mandatory field error message has an extra comma at the end and no comma between first two fields
- Got a target invocation exception error after changing one of the statuses
- Email notification never sent after changing the status despite having business rule
- Add button on inline grid shows up different spots in two different inline grids
- Restrict dropdown not working on Grid edit when I navigate to a filtered list using data metric
- Updated class icon not loading on data metric homepage
- Some of the mandatory business rules not working
- MultiTenantLoginSelected should be updated when User-Tenant relationships are updated
