

TURANTO RELEASE DOCUMENT

Turanto – June 18, 2021 Release 16.6

June 18, 2021 Release

Overview

- This new release includes some new features, enhancements and bug fixes.

Release Details

New Features and Bug fixes

- Launch page – browser refresh adds the app in process again in queue. Same application launching from another browser adds in queue.
- Matrix view bulk update related bug fixes.
- Dashboard and Data Metric related bug fixes and UI improvement.
- Technical and other documents (some new documents and updated the old ones)
- Document Template enhancement to open PDF in popup.
- Calculated property related bug fixes.
- Safari browser bug fixes.
- Code publish error due to some new package installed.
- Document template buttons not showing on Details page.
- Business rule lock record bug fix.
- Popup card UI fix.
- Instruction property UI fix on Details page.
- Matrix view performance improvement.
- Multiselect dropdown validation.
- Real Time Monitoring feature bug fixes.
- Pagination and page size cookie issues with default entity pages.
